Web Development

Aug, 2022 – Sept, 2022

PlotMyData

- Develop visualizations with React.js & D3.js framework
 - Designing of a web application with the help of React.js, Tailwind
 - Used by more 2000+ Monthly User
-

PROJECTS

QuadX care – quadxcare.com

a comprehensive app designed to streamline drone repair services, offering seamless customer management and repair tracking. Easily book, manage, and monitor drone repair requests to ensure your drones are always in top condition.

CareCalendar

an intuitive app designed to simplify doctor appointment management for both patients and doctors. Users can effortlessly create, update, and track appointments while doctors can efficiently manage their schedules and patient interactions.

FINITE LOOP WEBSITE – finiteloop.in

- Developed using MERN Stack.
- Built to Manage and interact with club members.
- Used for and by 150+ Members of club.

INCRIDEA '22 OFFICIAL WEBSITE

- React.js, Node.js, Tailwind, Razorpay, Firebase
 - Built to manage Students during the college fest.
 - Used by 8000+ students from my college and other colleges.
-

VOLUNTEERING

HacktivSpace Community

- Led various projects as a technical lead at HacktivSpace, a community focused on technology and innovation.
- Demonstrated effective leadership and project management skills while overseeing project execution.
- Utilized technical expertise to guide and support team members, ensuring successful project implementation.

Incridea Technical Committee

- Played an active role in the technical committee of our college fest, Incridea '22.
- Collaborated in a team to create the fest website and a control panel to be used by event organizers.
- Integrated payments within the website, and was used by around 8000 people throughout the duration of the fest.
